

## PUBLISHER'S NOTE

*Christy Solves a Mystery* is a truly meaningful story that needs to be told. It's perfect for primary readers and preschoolers alike; chock full of extra activities including letter and number recognition and practice, all enhanced with beautiful illustrations. It's thoughtfully written to help all children realize, at a very early age, their role and relationship with the environment.

*Christy Solves a Mystery* is the first in the *ABC Adventure Series* by author, Annabella Stoyke, and is a brilliant beginning of what's sure to be an entire collection full of compassion, mindfulness, and essential education for the times. Each and every story will be one we'll want to pass on to future generations.

This book serves parents and teachers alike, not only as a wonderful introductory tool to share with their children and students, but also as a gentle reminder of their part in the solution to a healthier world.

Annabella has been committed to the vision she has for *Christy Solves a Mystery* and the *ABC Adventure Series* for many years, and we're honoured to partner with her to bring this excellent work to life.
